

Uni-Spray Systems spray nozzles and piping systems are the preferred products for leading OEM and engineering firms designing complete paint solutions for customers around the globe. Over the past 20 years, we have established a significant market presence in the Metal Finishing Industry with installations in 40 countries around the world. Our products are used by manufacturers of appliances, automotive, office furniture, motorcycle, bicycle, utility vehicles, racking and shelving, lawn mower/garden tractors, and electrical boxes. Applications range from new systems to retrofits and expansion of existing equipment.

In addition, our products are available for aftermarket applications via distributors selling powder paints, metal cleaning chemicals, or offering paint line services to large corporations in our target markets. We maintain our leadership role through our continuing commitment to develop new products, improve overall efficiencies, and by responding to our customers' needs.

Our goal is to design and make quality nozzle assemblies and pipe systems that result in increased efficiencies and cost-savings for our clients. Our success is the result of listening to our customers and providing solutions from our existing product line or developing specific products to meet their individual needs.

## NEW AND INNOVATIVE PRODUCTS

Uni-Spray continues to design and develop new and innovative products. Our extensive line of nozzle assemblies available now in 3 different versions and 2 material types, including our highly successful line of quick change tips, allow us to meet all spray requirements in the harshest of environments. As a versatile company, we are also able to work to specific requirements of our customer, if there is not a standard tip that meets your specific needs. Uni-Spray is not limited to just nozzles. Exploring our website will show you the full range of product we handle including:

- Custom designed riser and header systems
- Quick disconnect pipe fittings
- Riser supports
- Pipe tapping saddles (mechanical tees)
- Tank mixing eductors

Our website ([www.uni-spray.com](http://www.uni-spray.com)) provides interactive links to allow you to see how Uni-Spray can assist you in maximizing the performance of your pre-treatment system.

## COMPETITIVE ADVANTAGES

- Complete product range — we are the only company specializing in both nozzles & piping systems
- Better functionality e.g. Quick alignment of nozzles resulting in efficient full spray coverage
- Wide range of standard products that can be easily adapted to customized production environments at very competitive prices & quick turnaround time
- Low-cost manufacturing & innovation resulting in long-term product availability
- Continuous product development

## BENEFITS

- Innovative design & continuous development
- Comprehensive systems resulting in greater efficiencies
- Comprehensive technical support & literature for easy product selection
- Competitive prices due to advanced manufacturing techniques
- Product availability for immediate delivery resulting in reduced inventory
- Over 20 years of experience in metal finishing industry

WORLD LEADER IN COST-EFFECTIVE INDUSTRIAL SPRAY APPLICATIONS.
