

It's easy to do
YOUR PART to help
the environment.

When you use Uni-Spray's nozzles, you're showing your concern for the environment.

That's because our nozzles are now fully biodegradable. Thanks to advanced compounding, you get the same flawless quality you've come to expect, coupled with the capacity to break down harmlessly within one to three years.

Compare that to the 100 years that average plastics take to biodegrade.
